# CASTELFALFI LIGHTS

## Furniture Design 2025

01

**THE PROBLEM:**  
A resort in the Italian Tuscany dating from 1800 looking to re-design their outdoor lights keeping a classic style matching the rest of the villa.

# CASTELFALFI LIGHTS

## Furniture Design 2025

### THE SOLUTION:

Two different outdoor solutions made with brass (bronze finish) and glass, manufactured the traditional way but finished with modern touches like LED discs.

### THE CHALLENGES:

Fitting LED units within these "old" designs.

Water-proofing the units.

Providing access to the LED units in case they needed replacement.

# 01.

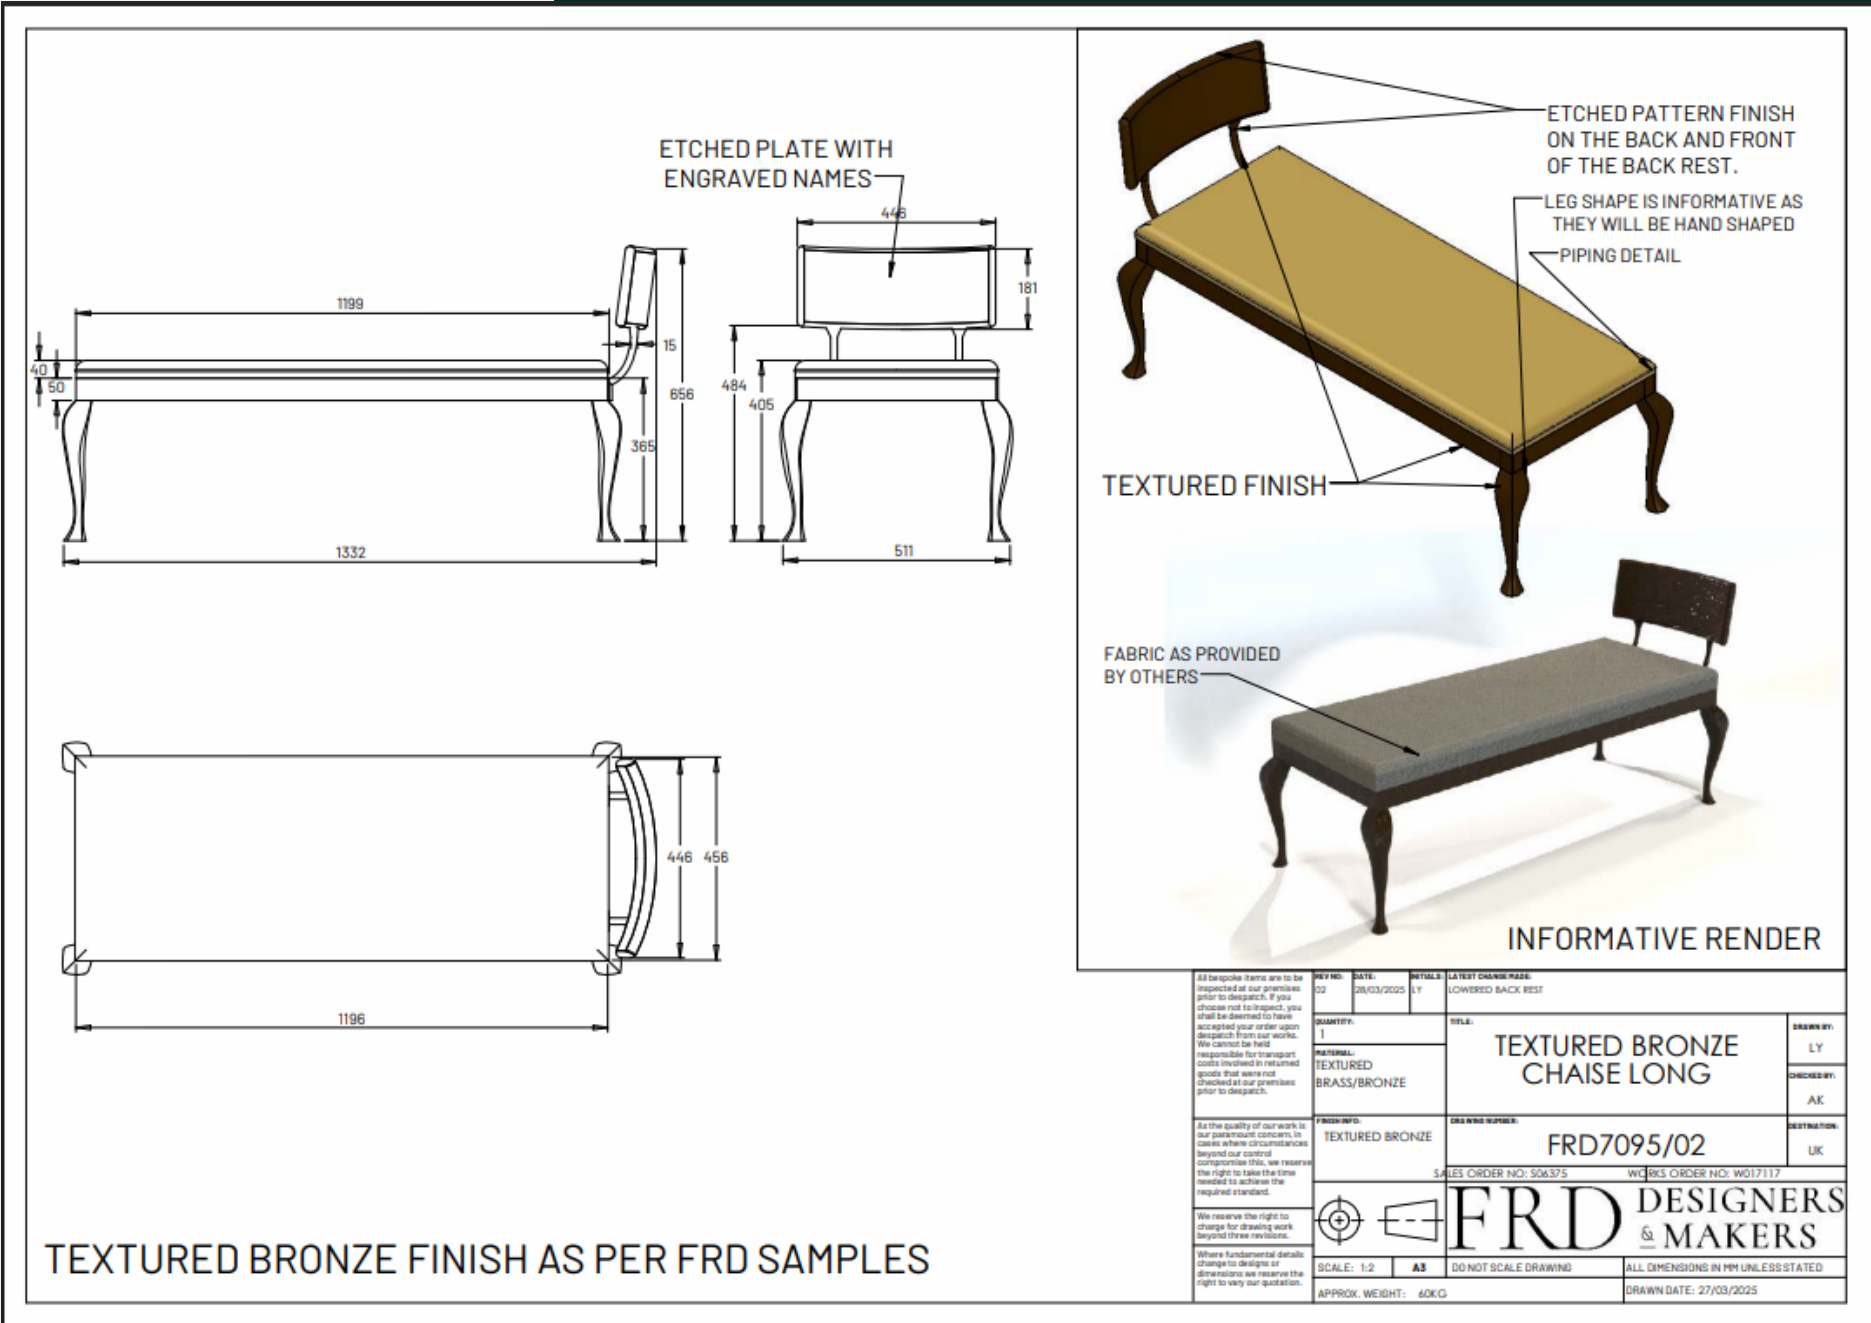

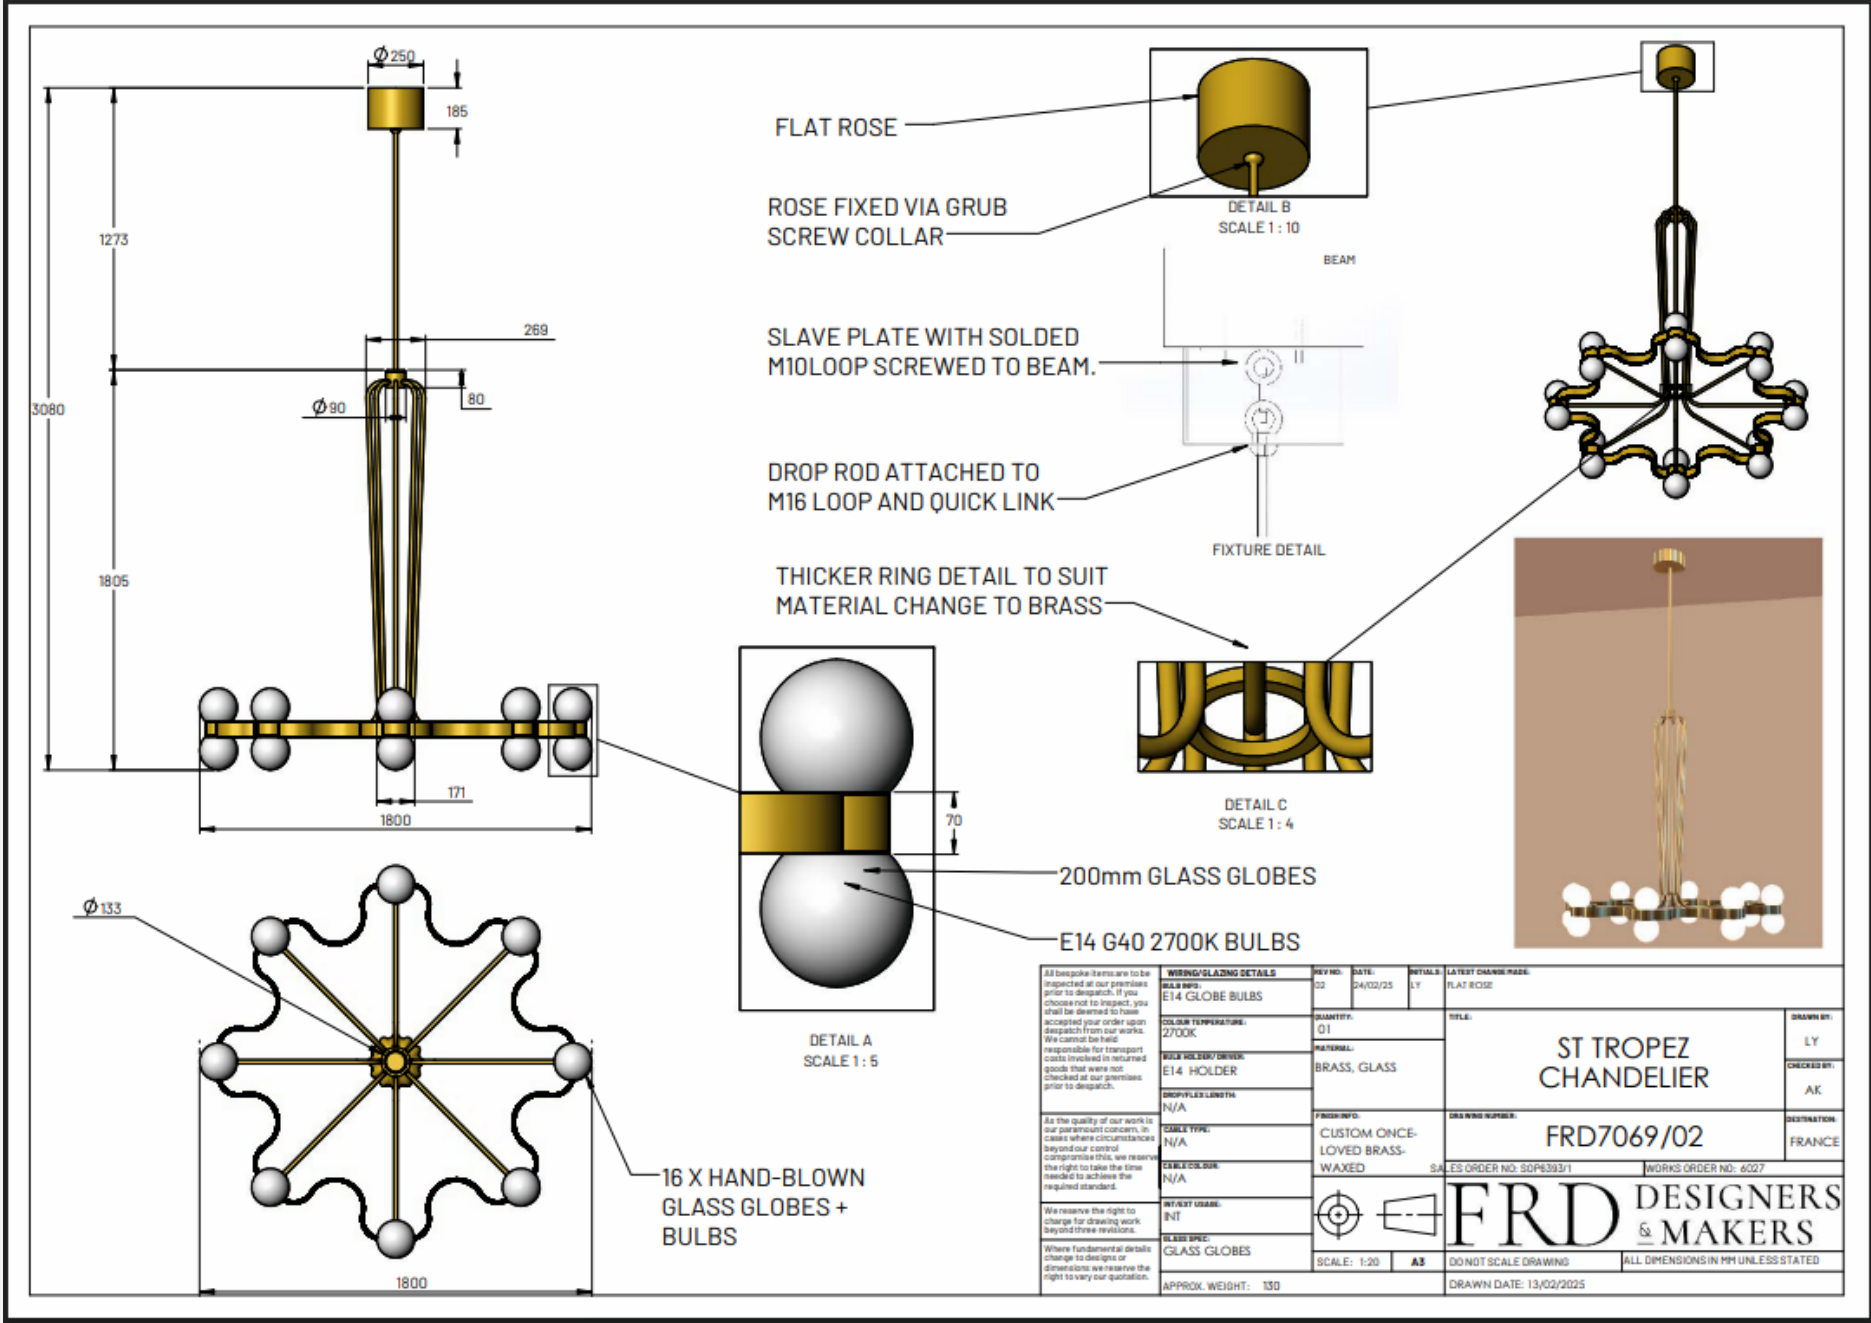

# HIGH END FURNITURE (2024-25)

**THE PROJECTS:**  
Pieces of furniture designed and manufactured for different UK and Europe based Interior Desingers. Main projects: ligh fittings, chandeliers, tables, benches...

**THE PROCESS**  
All pieces were manufactures and created the traditional way using methods like metal casting, soldering, turning etc.

02.

# MONSTER ENERGY BOX (2026)

## THE PROJECT:

Packaging design created from scratch for the new 250ml Monster Energy cans.

The box was designed as a gift to the brands athletes to open up and promote on social media.

# 03

# URA TOOL (2022)

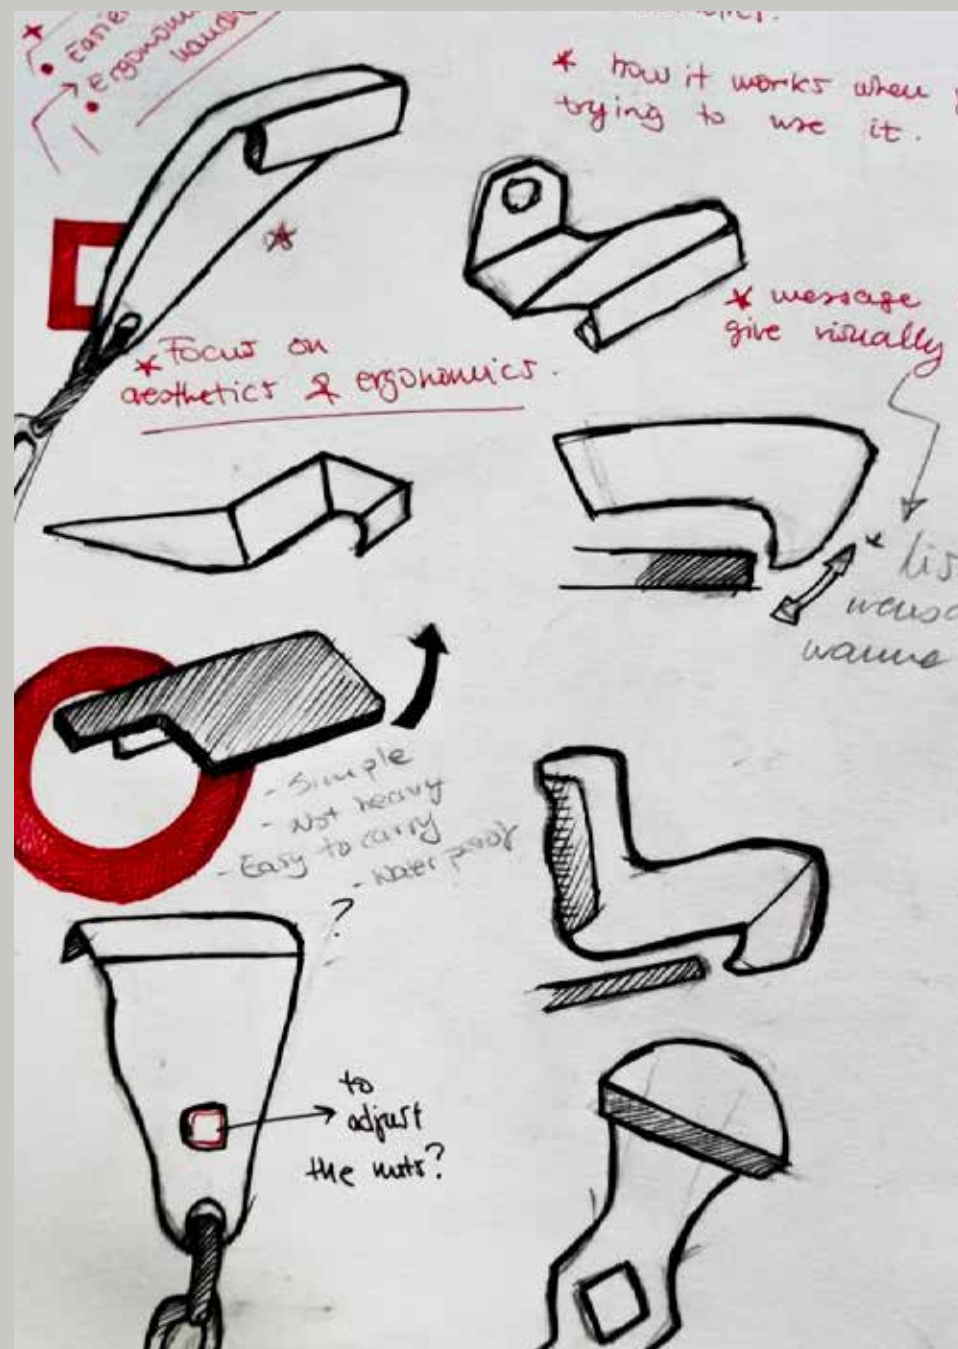

# 04.

## THE PROBLEM:

Action cameras that come with a protective case happen to be complicated to open and manipulate during cold or exposed situations and sports.

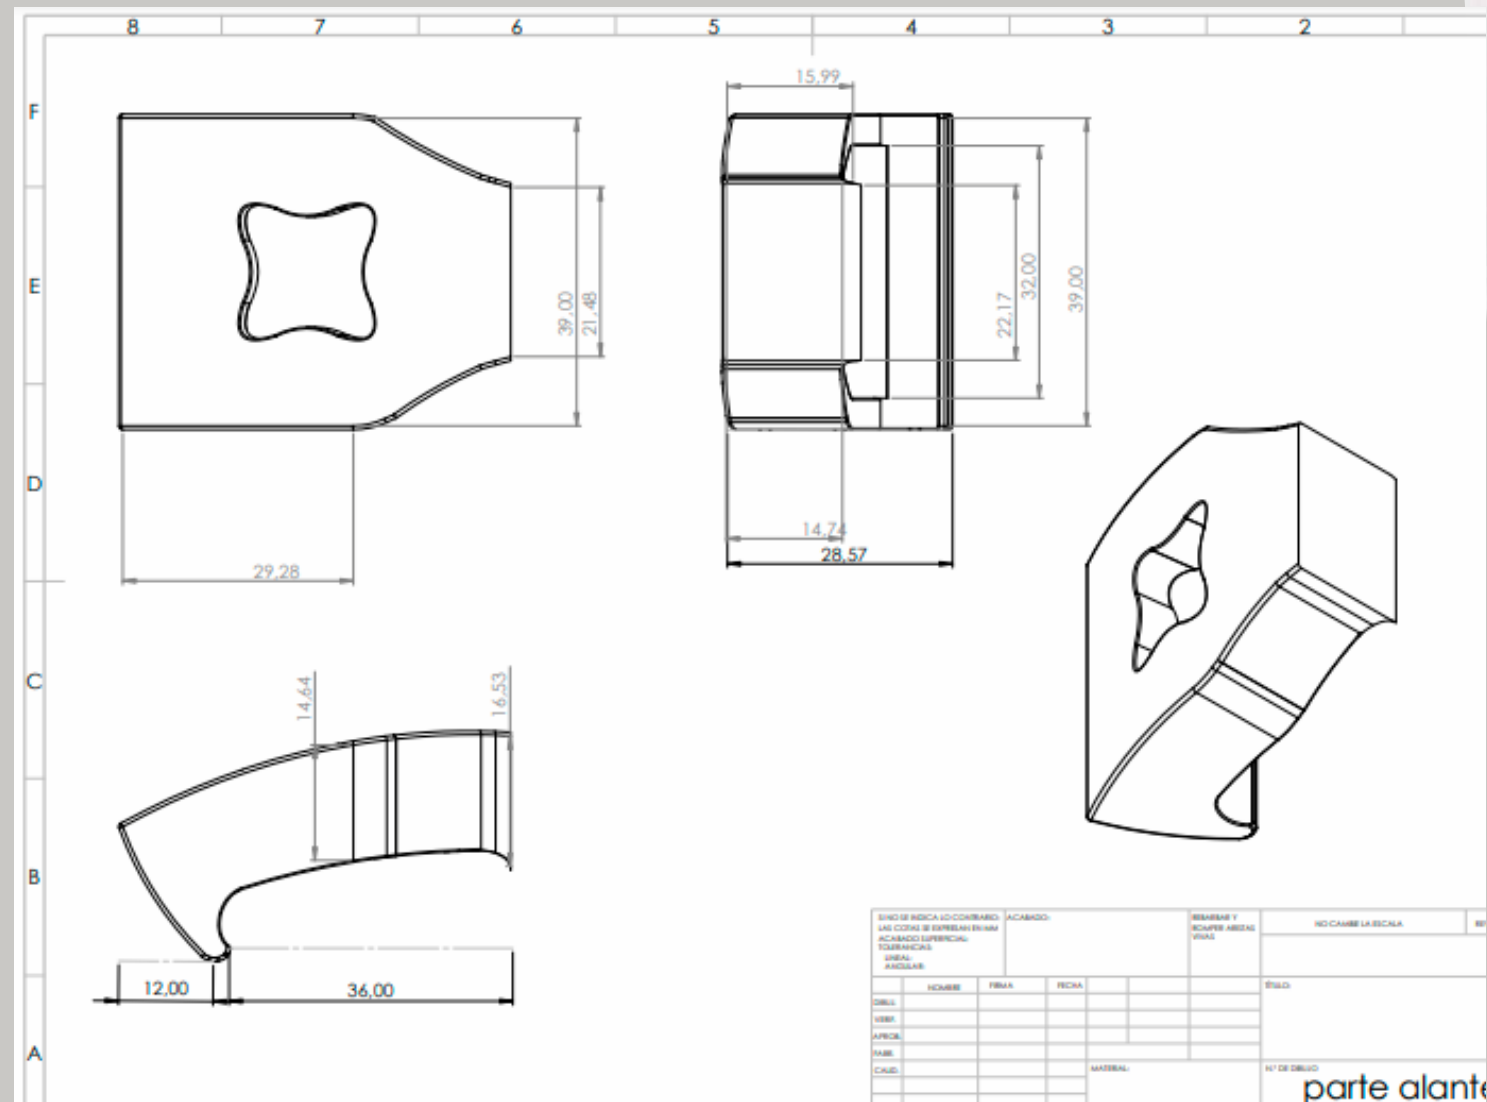

## THE SOLUTION:

A lightweight, portable and resistant tool that can be carried with the camera at anytimes and that offers an easier way of opening the case and loosening the bolts.

## THE CHALLENGES

- The tool had to be super resistant.
- Size was an important factor as it could not be too bulky or be too small to manipulate.
